

Crack the Code Puzzle - Week 2

1. Mark 15v27
2. Matthew 26v20
3. Matthew 26v15
4. Matthew 27v51

$$1 \times 3 = ?$$

$$(? \div 2) - 4 = \underline{\quad}$$

For the next part of the code I am looking for a 1-digit number... Can you solve the puzzle to find the number?

Make sure to look up the 4 references... Maybe they mention a number?
